CLARENCE NEIL MENESES

FULL-STACK WEB DEVELOPER | React · TypeScript · PHP · PostgreSQL · Shopify · REST APIs

Tanauan City, Batangas | 0995-516-6278 | clarenceneilpamplona@gmail.com

github.com/clarenceneilmeneses | linkedin.com/in/clarenceneilmeneses

PROFESSIONAL SUMMARY

Full-stack developer who ships systems that run real operations: a supply company's **sales platform now handling ₱1M+ in monthly sales**, the **web platform and mobile apps of its funded home-services venture** (both on Google Play), and a villa rental business's **live booking and payments platform**. React/TypeScript, React Native, PostgreSQL, PHP, Shopify.

RELEVANT DEVELOPMENT EXPERIENCE

Full-Stack Developer (Freelance) — Booking & Operations Platform *Aug 2026 – Present*

Malaya Villas — private villa rental business, 10 villas (malayavillas.com)

- **Built the platform the business runs on** — booking site and staff back office (React, TypeScript, Supabase) that replaced the owner's spreadsheets for all 10 villas on Oct 1.
- **Built online payments and Airbnb sync** — Xendit checkout and 9 synced villa calendars, so no double bookings.
- **Shipped through owner-reviewed pull requests** — plus test checklists and a training video for its 18 staff users.

Founding Developer (Contract) — Web Platform & Mobile Apps *Jun 2026 – Present*

PapaFix — funded home-services marketplace under NAM Builders Supply Corp · retained after internship

- **Built the web platform the business runs on** — 15 modules spanning bookings, technician onboarding, payment settlement, pricing, live dispatch, and audit, with a 292-case test suite (React 19, Supabase, Leaflet, Recharts).
- **Designed security and audit in the database** — row-level security so no secret key reaches the browser, plus an append-only payment/booking event log written by triggers that no admin can delete.
- **Redesigned both mobile apps (React Native, Expo)** — one shared design kit across 40+ screens of the customer and technician apps, shipped over the air through reviewed pull requests with no new store build.
- **Built the parent company's KPI board** — scores the CEO's three businesses against one weighted scorecard, fed by live sales data.

Shopify Developer (Freelance) — Product Pages & Catalog *Oct 2026*

Lumea — German beauty & lifestyle e-commerce store (lumea-de.com)

- **Built custom Liquid product-page templates** and a Python + Shopify Admin API catalog pipeline; 4 product pages live.

IT Intern / Systems Developer *Feb 2026 – Apr 2026*

ALM Management Services & NAM Builders Supply Corp

- **Cut management reporting from a week of cross-department spreadsheet compilation to on-demand dashboards** — an executive BI view with cross-filtering drilldowns by company, category, and manager.
- Built the company's **first sales management system**, replacing spreadsheets for quotations, sales, inventory, finance and logistics; it now handles the company's ₱1M+ in monthly sales.
- Re-architected it on React, TypeScript and Supabase, migrating every production record from MySQL to PostgreSQL.

EDUCATION

BS Information Technology (Business Analytics) — Batangas State University *Graduated July 2026*

Certified: Google Analytics & Ads Measurement (Google, 2025)

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, React Native (Expo), JavaScript, HTML5, CSS3, Tailwind CSS, Shopify (Liquid), Figma (UI/UX)
- **Backend & Databases:** PHP, PostgreSQL (Supabase: RLS, RPCs, Edge Functions), MySQL, SQL, REST APIs, Python
- **Data & Analytics:** Dashboarding & visualization (Recharts), ETL/migration scripting, Excel
- **QA & Tools:** Unit testing (Vitest), test design, UAT, Git/GitHub, Remotion (motion graphics), AI-assisted dev (Claude Code)

ACADEMIC PROJECTS

Capstone: Client Management Portal for PDAO, City of Sto. Tomas *May 2025 – Dec 2025*

- Led development of a PHP/MySQL portal for the city's ~4,000 registered PWDs: ID applications, appointments, tracking.
